SNOHOMISH COUNTY DATA and MAP DISCLAIMER

All maps, data, and information set forth herein ("Data"), are for illustrative purposes only and are not to be considered an official citation to, or representation of, the Snohomish County Code. Amendments and updates to the Data, together with other applicable County Code provisions, may apply which are not depicted herein. Snohomish County makes no representation or warranty concerning the content, accuracy, currency, completeness or quality of the Data contained herein and expressly disclaims any warranty of merchantability or fitness for any particular purpose. All persons accessing or otherwise using this Data assume all responsibility for use thereof and agree to hold Snohomish County harmless from and against any damages, loss, claim or liability arising out of any error, defect or omission contained within said Data. Washington State Law, Ch. 42.56 RCW, prohibits state and local agencies from providing access to lists of individuals intended for use for commercial purposes and, thus, no commercial use may be made of any Data comprising lists of individuals contained herein.

Parcel lines and designation boundaries are adjusted to the Snohomish County Assessor Integrated Land Records Parcel Data Base as of March 2013.

This map is a graphic representation applied from the Snohomish County Geographic Information System. It does not represent survey accuracy. This map is based on the best available information as of the date shown on the map.

Data collection is an on-going process and the information shown should not be considered complete. This map is not intended for regulatory purposes as scale, accuracy and completeness are not adequate to determine regulatory implications at a site-specific level. Presence of environmental features and critical areas, as defined in the Growth Management Act, must be verified at the site specific level. These maps are intended to provide a generalized overview of the extent and distribution of key environmental features and critical areas throughout the county. This map represents the best available data at the time of publication.

For the purposes of land use application review, final determination of future land use designations will be made by the County during the review process.
